ELSEVIER J. Biochem. Biophys. Methods 35 (1997) 213–214

JOURNAL OF
biochemical and
biophysical
methods

Contents of Volume 35

No. 1
Research Articles
O.L. Córdoba, S.B. Linskens, E. Dacci, J.A. Santomé (Argentina)
'In gel' cleavage with cyanogen bromide for protein internal sequencing 1

Q.-T. Li, W.K. Kam (Singapore)
Steady-state fluorescence quenching for detecting acyl chain interdigitation in phosphatidylcholine vesicles 11

G.M. Makrigiorgos (USA)
Detection of lipid peroxidation on erythrocytes using the excimer-forming property of a lipophilic BODIPY fluorescent dye 23

D. Mislovičová, A. Vikartovská, P. Gemeiner (Slovak Republic)
The glycosylated enzyme-binding assay for the study of the interaction of free and immobilized lectins with carbohydrates 37

B. Uzan, E. Pines, D. Gill (Israel)
Removal of dissolved O_2 by a fluid membrane of Fomblin Y (perfluoro polyether): fluorescence of diphenylhexatriene in Fomblin Y 49

Short Communications
J. Escobar, G. Cárdenas, E. Lissi (Chile)
Evaluation of the total content of lipid-soluble antioxidants in blood plasma samples employing a simple chemiluminescence quenching procedure 57

N. Nagesh, D. Chatterji (India)
A useful method for the synthesis of 8 azido-guanosine tri- and tetraphosphate: important substrates for many enzymatic reactions 61

Instructions to Authors 67

Announcement

No. 2
Research Articles
D. van den Boom, A. Ruppert, C. Jurinke, H. Köster (Germany)
Combined amplification and sequencing in a single reaction using two DNA polymerases with differential incorporation rates for dideoxynucleotides 69

A.H. Gitter, J.-D. Schulzke, D. Sorgenfrei, M. Fromm (Germany)
Ussing chamber for high-frequency transmural impedance analysis of epithelial tissues 81

S0165-022(X)00050-X

N.G. Green, H. Morgan, J.J. Milner (UK)
Manipulation and trapping of sub-micron bioparticles using dielectrophoresis 89

P. Johansson, I. Wadsö (Sweden)
A photo microcalorimetric system for studies of plant tissue 103

V.V. Khramtsov, V.I. Yelinova, Yu.I. Glazachev, V.A. Reznikov, G. Zimmer (Russia, Germany)
Quantitative determination and reversible modification of thiols using imidazolidine biradical disulfide label 115

Short Notes
E.L. Romero, M.F. Pardo, S. Porro, S. Alonso (Argentina)
Sialic acid measurement by a modified Aminoff method: a time-saving reduction in 2-thiobarbituric acid concentration 129

M. Ceolín, J.A. Martínez, M.R. Ermácora (Argentina)
Time differential perturbed angular correlation of ^{111}In-EDTA linked to the single free cysteine of bovine serum albumin 135

No. 3
Research Articles
M.J. Kujau, A. Siebert, S. Wölfl (Germany)
Design of leader sequences that improve the efficiency of the enzymatic synthesis of 2′-amino-pyrimidine RNA for in vitro selection 141

M. Solanas, E. Escrich (Spain)
An improved protocol to increase sensitivity of Southern blot using dig-labelled DNA probes 153

J.W. Cole, R.W. Hendler, P.D. Smith, H.A. Fredrickson, T.J. Pohida, W.S. Friauf (USA)
A high speed optical multichannel analyzer 161

N. Chen, A. Chrambach (USA)
Capillary electrophoresis of DNA fragments in 9 to 20% uncrosslinked polyacrylamide gels: unique separating capacity hypothetically related to maintenance of random-coil DNA conformation independently of gel concentration 175

B.O. Jensen, J. Skeidsvoll, H. Holmsen (Norway)
A polarographic method for measuring dissolved nitric oxide 185

Research Note
K. Dill, S.D.H. Chan, T.W. Gibbs (USA)
Detection of plasmids using DNA and RNA probes and the light-addressable potentiometric sensor 197

Short Note
O. Ishibashi (Japan)
A new method to synthesize competitor RNAs for accurate analyses by competitive RT-PCR 203
